User Stories

User Story 1: As a new user I want to create an account with the workout tracker app by setting up a profile.

Description: After downloading the app the user will be shown the login page. If the user is new then they can either sign up through their Github login or click on the "Sign Up" button where they will be redirected to a new page to create their account. The user will be prompted to enter their full name, email, and password. Once they fill out the information they should click the "Create Account" button which will store the new user's information in a database and the user will be directed to the homepage of the app.
